

## **WHY CREATE A PARTY FOCUSING ON THE FAMILY?**

Most legislation affects the family in some way. Consider issues such as aged care, education, hospitals and the environment. Political parties generally have a constituency they predominantly represent, like business, unions or rural voters. Family First Party as the name indicates represents families.

Healthy and stable family life is the key to the prosperity of our communities and society. Family First will work towards change in law and policies that creates the best possible environment for strong and happy family life.
